

CONTENTS

Preface	11
1. Introduction to the Global Supply Chain	15
Introduction to Supply Chain Management	16
The Supply Chain	17
Understanding the Supply Chain	23
The Global Context of Supply Chain Management	30
The Approach of the Book	33
Summary	37
2. Structure and Process	39
The Value Chain and the Value System	41
The Structure of the Supply Chain	43
The Bullwhip Effect	50
What are Activities?	52
Core Competencies and Outsourcing	53
Components in Supply Chain Management	55
Business processes	57
Concluding Comments	62
3. Inter-organizational Relationships	63
Relationships from a Network Perspective	65
Transactions	73
Perceptions of Trust	81
Developing Collaborative Relationships	87
Conclusion	88
Illustrative Case	89
4. The Information System for the Supply Chain	95
Introduction	95
Logistics Information	97

Information Exchange	99
Information and Operations	100
The Concept of a Supply Chain Information System	101
Elements of the Information System	105
Software Systems	106
Concluding Comments	122
Illustrative Cases	122
5. Distribution	127
Push versus Pull	128
The Major Elements of Distribution and its Requirements	129
The Marketing Channel	133
Major Channel Decisions	134
Retailing as a Distribution Function	140
E-commerce and the Supply Chain	144
International Markets	149
Collaborative Distribution Models	152
Conclusion	157
Illustrative Case	157
6. Production Issues for the Supply Chain	161
Supply Chain Requirements – A Chain of Processes	162
Management Concepts in Production and SCM	163
Strategic Perspectives on Production Processes and Technology	180
Product Design for the Supply Chain	182
Emerging Production Paradigm – Modular Production	185
Illustrative Case	186
7. Innovation Management in Supply Chains	189
Platform Strategies	192
Product Architecture Strategies	194
NPD's Impact on Outsourcing	198
NPD for Recycling	204
Illustrative Cases	206
8. Procurement	209
Driving Forces Behind the Strategic Importance of Procurement	210

Portfolio Approach to Supplier Relationships	223
Conclusion	234
Illustrative Case	235
9. Service Management in Supply Chains	241
Introduction	241
Characteristics of Service Supply Chains	243
Structural Changes in Supply Chains	246
Third-Party Logistics	251
The Future of European Transport and Logistics	262
Conclusion	266
Illustrative Case	266
10. Reverse Logistics and Supply Chain Sustainability	269
Major Types of Return Items	270
The Challenge of Reverse Supply Chain	273
A Centralized Reverse Supply Chain	274
A Decentralized Reverse Supply Chain	277
The Marginal Value of Time	278
Green Supply Management	280
Product Stewardship	280
The Triple Bottom Line and the Supply Chain	281
Conclusion	283
Illustrative Cases	285
11. Performance Measurement and Management in the Supply Chain	289
Measures and Measurement Systems	291
System Thinking in Performance Measurement	292
Inclusiveness in Supply Chain Performance	294
Effects of Supply Chain Performance Measurement	296
Supply Chain Performance Measurement Frameworks	297
The Strategic Profit Model	298
Target Cost Management	300
Total Cost of Ownership	302
Activity-Based Costing	304
The Balanced Scorecard	309
The SCOR Model	311

Concluding Comments	316
12. Strategy and the Supply Chain	319
Strategy and the Supply Chain	320
Matching Product Uncertainties with Supply Chains	326
Supply Structures for Customization	329
Supply Chain Integration	330
Strategy of Functional Areas	334
Conclusion	338
13. Supply Chain Planning – Modelling Considerations	339
Reasons for Quantitative Modelling	341
Modelling Sourcing Strategies – Statistical Approach	345
Modelling the Demand Variability in SC – Bullwhip Effect	356
Modelling Product Architecture Modularization for Mass Customization	359
Limitations Related to Modelling	362
14. Managing the Complexity of the Global Supply Chain	365
The Environmental Complexity of the Supply Chain	367
The Structural Complexity of the Global Supply Chain	377
The Global Network	383
References	391
Index	413
